ESTABLISHED 1864

NORWAY SPRUCE

THE LEADING EVERGREEN

THE BEST SHELTER-BELT TREE.

(For description, see page 8.)

Transplants	Each	10	100
18 to 24 inches.....	\$.30	\$1.75	\$10.00
2 to 3 feet.....	.40	2.75	16.00

Our Guarantee

We guarantee our stock to be true to name and to be in every way just as represented. If it is not, we will make satisfactory adjustment. This guarantee shall, however, in no case make us responsible for more than the original invoice value of the stock.

Evergreen Nursery Company, Sturgeon Bay, Wis.

SUGGESTIONS TO OUR CUSTOMERS:

SHIPPING INSTRUCTIONS—Please state whether you want the stock sent by freight or express (we recommend express for Evergreens), and, if you have a preference, also specify the route. This information will greatly facilitate our work and enable us to give you better service.

TERMS—Cash with order unless special agreement has been made for other terms of payment or satisfactory reference is given.

RATES—Five trees of the same size and variety will be sold at the ten rates, and fifty trees of the same size and variety at the one hundred rates.

BY WAY of EXPLANATION

SEEDLINGS.—Seedlings are trees which are grown from seed, but which have never been removed from the original seed beds.

TRANSPLANTS.—After a seedling has reached the age of from two to four years, it is carefully dug and replanted in rows where it is cultivated and given room to develop. Transplanting gives the tree fibrous roots and stocky symmetrical tops.

ROOT PRUNING.—At the time of transplanting, our trees are root-pruned by experienced men. The pruning has a tendency to make the tree force out fibrous roots or feeding roots which are essential for the growth of the tree.

EVERGREEN NURSERY CO.,

STURGEON BAY, WIS.

YOU NEED OUR EVERGREENS:

FOR PROTECTION, BY WINDBREAKS, TO HOUSE, BARN, ORCHARD OR FEED LOT, use White Spruce, Norway Spruce, Scotch Pine, Austrian Pine, White Pine, and Balsam Fir.

Our experience has shown that the best windbreak consists of three or more rows planted alternately 8 to 10 feet apart each way, thus:

WINDBREAKS are, in more ways than one, a farm asset. They tend to prevent the soil from drying out quickly and they protect grain and orchards from mechanical injury by wind. A belt of trees by the farm buildings protects them from extreme cold and summer heat, and makes the farm a pleasanter place in which to live. The windbreak may also be a source of wood supply for use on the farm or for sale. (Taken from U. S. Farmers' Bulletin 788).

FOR HEDGES AND SCREENS—Use American Arbor Vitae, Norway Spruce, and Hemlock for hedges. For screens, use American Arbor Vitae, White Pine, Scotch Pine, Austrian Pine, and White Spruce.

FOR ORNAMENTAL AND LAWN PLANTING we recommend Colorado Blue Spruce, American Arbor Vitae, Mugho Pine, Norway Pine, Norway Spruce, and Irish Juniper.

FOR SMALL LAWNS, GROUPINGS AND ROCKERIES use Colorado Blue Spruce, Mugho Pine, Siberian Arbor Vitae, Globe Arbor Vitae, Pyramidal Arbor Vitae and Irish Juniper.

MAY WE HELP YOU?

Individual planters often have problems in reference to trees and plants which we will gladly help them solve. In our 50 years and more of experience, we have encountered most of these problems and have overcome them.

AMERICAN ARBOR VITAE (*Thuja occidentalis*)

Most widely used hedge plant in America.

**American Arbor Vitae Hedge.**

The American Arbor Vitae (which means, "tree of life") is the leader among all hardy hedge plants. It probably is the hardiest of all Evergreens, and in addition to this quality it is adapted to a great variety of soils. It endures any amount of trimming, retains its compact form, and possesses a rich green color, hence makes an ideal hedge.

Individual trees, when allowed to develop on the lawn, will grow into symmetrical, conical trees; or they may be sheared to any desired shape without injury. American Arbor Vitae is an excellent tree for grouping or for use as screens or windbreaks, and may be used either alone or in connection with other evergreens.

Transplants	Each	10	100
12 to 18 inches.....	\$.20	\$1.25	\$ 6.00
18 to 24 inches.....	.30	1.75	10.00
2 to 3 feet.....	.50	3.00	16.00

See page 12 for seedlings.

Gentlemen: — Last spring I bought two hundred Arbor Vitae hedge trees from you. They arrived in excellent condition, and I am glad to report that every one of the little trees lived and has grown nicely. My object in writing to you now is to ask if there is any especial care or attention which should be given them for this winter.

Very truly yours,
(Miss) Elsie Pepoon.

**Sheared Specimens of American Arbor Vitae.**

ARBOR VITAE—Pyramidal (*Thuya occidentalis, var. pyramidalis*)

A unique form of Arbor Vitae whose foliage closely resembles the American, but whose form, as the name indicates, is pyramidal.

Transplants	Each	10
8 to 12 inches.....	\$1.00	\$ 7.00
12 to 18 inches.....	1.25	10.00
18 to 24 inches.....	1.50

The following varieties are of dwarf habit and are quite hardy. The Siberian Arbor Vitae has a conical shape.

SIBERIAN ARBOR VITAE(*T. occidentalis Wareana*)

Transplants, 8 to 12 inches.....Each \$.75

GLOBE ARBOR VITAE (*T. occidentalis globosa*)

Transplants, 8 to 12 inches.....Each \$.75

Globe
Arbor Vitae.

AUSTRIAN PINE (*Pinus austriaca*)

The Austrian Pine is a native of Europe. It is hardy, long lived, and a rapid grower and requires only a moderately fertile soil. Very valuable for windbreaks and screens.

Transplants	Each	10	100
24 to 36 inches.....	\$.45	\$3.00	\$18.00
3 to 4 feet.....	.60	4.25	25.00

For seedlings, see page 12.

**Double row
windbreak
of
Austrian Pine.
A sturdy,
long-lived
Tree.**

SCOTCH PINE (*Pinus sylvestris*)

Scotch Pine is a faster grower than any other evergreen. This quality alone is enough to recommend it for many purposes where quick results are desired. On account of its rapidity of growth, extreme hardiness, ability to grow on poor soil, and the ease with which it is transplanted, it is a very valuable windbreak tree for which purpose it is used extensively.

Transplants	Each	10	100
24 to 36 inches.....	\$.30	\$1.75	\$10.00
3 to 4 feet.....	.35	2.25	13.00

For seedlings, see page 12.

WHITE PINE (*Pinus Strobus*)

White Pine is the standard forestry tree of the North and East. It is very sturdy, long lived, and a rapid grower. We recommend it highly as a windbreak tree, while individual specimens make a pleasing ornament.

Transplants	Each	10	100
18 to 24 in....	.25	\$1.50	\$ 8.00
2 to 3 feet.	.35	2.52	11.00

"In the Lake States, the White Pine is recommended for windbreaks above all other species, because of its rapid growth and high timber value, which justify its planting in wide belts or groves."

—U. S. Dept. of
Agriculture.

White Pine.

Norway Spruce.

NORWAY SPRUCE (*Picea Excelsa*)

The Best Windbreak Evergreen.

Without doubt, the Norway Spruce has no peer as a wind-break and shelter belt tree. It is perfectly hardy, a rapid grower, retains its lower branches, and is adapted to a wide variety of soils. As it stands shearing well, and is always green and compact, it makes a splendid hedge. Its use in windbreaks, shelter belts, hedges, screens, and ornamental plantings is universal throughout the East and Middle West. The most popular and most widely planted of all Evergreens.

L. H. Bailey, the eminent American Horticulturist, says of the Norway Spruce: "It is of rapid growth and is a handsome tree with its graceful habit and dark green, dense foliage. It is one of the best conifers to plant for shelters and windbreaks."

Colorado Blue Spruce

EVERGREEN NURSERY CO.

This Windbreak of Norway Spruce and Scotch Pine, planted less than thirty years ago, has been giving protection for more than twenty years, and it's good for a long time to come. By planting our 2 to 3 foot trees you can, in a short time, have a shelter belt that will give you splendid protection.

Transplants	Each	10	100
18 to 24 inches.....	\$.30	\$1.75	\$10.00
2 to 3 feet.....	.40	2.75	16.00

See page 12 for seedlings.

BLACK SPRUCE (*Picea nigra*)

An uncommon evergreen with glistening blue-black foliage and purple cones. It is perfectly hardy. An excellent tree to give variety.

Transplants	Each	10	100
8 to 12 inches.....	\$.25	\$1.75	\$10.00

COLORADO BLUE SPRUCE (*Picea pungens*)

For beauty of color, this evergreen is unexcelled. The brilliancy of its steel-blue foliage is truly remarkable. Effective for mass plantings anywhere. It is perfectly hardy and we recommend it strongly.

Transplants	Each	10	100
3 to 6 inches.....	\$.20	\$1.50	\$ 8.00
4 to 8 inches.....	.25	2.00	11.00

For seedlings, see page 12.

Colorado Blue Spruce

HEMLOCK SPRUCE (*Tsuga canadensis*)**Hemlock Spruce Hedge.**

A graceful, hardy evergreen, that deserves more attention. Here is what one authority says: "It would not be exaggeration to pronounce this the most beautiful evergreen in cultivation." It stands shearing well and is not injured by shade.

Transplants	Each	10	100
4 to 8 inches.....	\$.20	\$1.50	\$ 8.00
8 to 12 inches.....	.30	2.00	11.00

BALSAM FIR (*Abies balsamea*)

The Balsam is noted for its fragrance, and quite properly, for no other Evergreen can compare with it in this respect. It is hardy and a moderately rapid grower. The natural habit of the Balsam is a perfect cone in the older trees.

Transplants	Each	10	100
18 to 24 inches.....	\$.30	\$2.00	\$12.00
2 to 3 feet.....	.50	3.00	18.00

For seedlings, see page 12.

DOUGLAS FIR (*Abies Douglassi*)

The Douglas Fir has a remarkably soft foliage. It is this species which furnishes most of the timber of the West. A splendid ornamental tree, being perfectly hardy and a strong grower.

Transplants	Each	10	100
4 to 8 inches.....	\$.25	\$1.50	\$ 8.00
8 to 12 inches.....	.35	2.25	11.00

For seedlings, see page 12.

**A splendid
example of
group
planting.**

WHITE SPRUCE (*Picea alba*)

A decorative tree of dense habit and with light blue-green foliage. When young, it has an oval shape which changes to a conical form as the tree grows older. This species has been used for ornamental plantings for hundreds of years, and although a native of North America, has been planted in England since 1700. It is much longer lived than the Norway Spruce, often reaching an age of 250 to 300 years. Due to its hardiness, density and longevity, it is widely used for windbreaks for which purpose it is rapidly gaining in popularity.

Transplants	Each	10	100
4 to 8 inches.....	\$.10	\$.75	\$ 5.00
18 to 24 inches.....	.20	1.50	8.00
12 to 18 inches.....	.30	1.75	10.00
8 to 12 inches.....	.35	2.25	12.00
2 to 3 feet.....	.45	3.00	18.00

For seedlings, see page 12.

NORWAY OR RED PINE (*Pinus resinosa*)

A hardy native of northern North America. One of the most ornamental of all pines. Fine for lawns and parks.

Transplants	Each	10	100
4 to 8 inches.....	\$.20	\$ 1.50	\$ 8.00
8 to 12 inches.....	.30	2.00	11.00

MUGHO PINE (*Pinus Mughus*) **DWARF**

A unique, dwarf, globe-shaped pine, seldom reaching a height of more than eight feet. It is a native of Switzerland. We recommend its use in rockeries, group planting and wherever space is limited.

Transplants	Each	10
8 to 12 inches.....	\$.50	\$ 4.00

IRISH JUNIPER (*Juniperus communis hibernica*)

The Irish Juniper possesses a narrow columnar form and very dense, deep green foliage. It is an excellent tree to break the monotony of ornamental plantings.

Transplants	Each	10
8 to 12 inches.....	\$.50	\$ 4.00
12 to 18 inches.....	.75	6.00

BALLED AND BURLAPPED EVERGREENS

These are specimen trees dug with a ball of earth around the roots. To hold the ball in place, it is tightly bound in burlap. We have found this to be the best method of handling large Evergreens, the percentage of loss being very small. Prices include balling and burlapping.

	Size	Each	Size	Each
BALSAM FIR	2 to 3 feet	\$1.50	4 to 6 feet	\$3.00

EVERGREEN AND CONIFEROUS SEEDLINGS

The growing of Evergreen seedlings has been a specialty with us ever since our nursery was established over fifty years ago. Our seed comes from many parts of the world and it is planted here in our nurseries under ideal conditions. We have published a little booklet on the care and culture of evergreens which we will gladly send free, when requested, with every order for seedlings.
